Education

Bachelor of Technology (B.Tech) in Computer Science

Graphic Era Hill University, Dehradun

2022 – 2026

CGPA: 8.0 / 10.0

XII (CBSE): 82% (2021) | X (CBSE): 86% (2019)

Technical Skills

- **Programming Languages:** Python, C, C++, Java, JavaScript, PHP
- **Operating Systems:** Linux, Windows, macOS
- **Core CS:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), DBMS
- **Networking & Security:** TCP/IP, DNS, HTTP/HTTPS, TLS/SSL, IAM, Zero Trust Principles, VPNs, Firewalls
- **Tools & Platforms:** Wireshark, Fiddler, Charles Proxy, HTTP Toolkit, Ping, Traceroute, NMAP, NSLOOKUP, Git, GitHub, VS Code

Professional Experience

Salesforce Developer Intern – AgentBlazer Champion Program

May 2025 – Jul 2025

Cloud Security & Automation Focus

- Managed complex **Salesforce security models**, including Role Hierarchy, Permission Sets, and Profiles to ensure Principle of Least Privilege (PoLP).
- Automated organizational workflows using Apex triggers and flows, improving system efficiency and reducing manual intervention.
- Gained hands-on experience in cloud org setup, identity management, and secure data access.

Software Engineering Intern – Utkarsh Classes & Edutech Pvt. Ltd.

Jul 2025 – Aug 2025

Python Development & Data Optimization

- Developed an Absenteeism Control Framework using Python (PyQt) and SQLite, focusing on data integrity and automated reporting.
- Optimized SQLite queries and indexing strategies, reducing data processing latency by 40%.
- Collaborated in a team environment to debug UI/UX issues, ensuring high availability and user satisfaction for internal tools.

Projects

Virtual Exam Environment (Kiosk Mode) — System Security

GitHub

C++, System Programming, Network Integrity

- Engineered a secure Kiosk system to prevent unauthorized resource access, implementing low-level system-wide interception to block restricted key combinations.
- Integrated real-time activity logging and integrity checks to monitor and record system anomalies.

Bright Brain (AI Tutor Chatbot) — API Integration

GitHub

PHP, JavaScript, REST APIs

- Designed modular API wrappers for ChatGPT integration, focusing on **latency reduction** (30% improvement) and structured error handling.
- Handled complex HTTP request/response cycles and ensured secure communication between the client and third-party endpoints.

Fake News Detection — Machine Learning/Analytics

GitHub

Python, NLP, Data Analysis

- Applied analytical thinking to process large datasets, using TF-IDF and Logistic Regression to identify patterns in misinformation.
- Evaluated model performance using precision, recall, and F1-score metrics, achieving strong classification results on real-world news datasets.

Achievements & Certifications

- **AWS Cloud Practitioner Essentials (Amazon Web Services):** Understanding of AWS core services (EC2, S3, IAM, VPC), cloud architecture principles, pricing, and security best practices.
- **Cyber Security Certification:** Focused on network defense, vulnerability assessment, and security protocols.
- **2nd Runner-Up, HACK-O-HOLIC '24:** Ranked 3rd out of 50+ teams; demonstrated rapid problem-solving and teamwork under pressure.
- **Salesforce AgentBlazer Champion (2025, Salesforce):** Specialized in cloud-based automation and security management.
- **Android Mobile App Development Certification:** Foundation in mobile OS environments and application life-cycle.
